

Why Idle?

save **240 lbs** CO₂!

Fact: Idling your vehicle for 10 minutes uses as much fuel as it takes to travel 5 miles.

Act: Use the 20 second rule! *If your car is stationary for more than 20 seconds, turn it off.* It uses less gas to turn off and on than it does to let your car idle.

save **\$95/year**

Why Idle?

Student Name: _____

Grade: _____

Parent Initials: _____

We pledge to not be idle all year
